Quick Start Guide version : 1.00 GB
For software version : OptiLink 7 Server + Web Access
Release date : 06-09-2016

Preface

The manual is intended for the user of the OptiLink 7 Server + Web Access tool.

The basic principle is that the user himself knows what the best conditions are for drying or storing the product. Hence the manual only explains how to set the program.

The program may only be used for the purpose for which the OptiLink 7 Server + Web Access was designed. The program may only be operated by the persons responsible for drying/storing the product. Never give the access codes to unknown persons, with these codes they can change settings and or start/stop the installation. This could result in loss of product quality.

In spite of the fact that every attention was paid to this manual, imperfections may occur. Any information that may assist in making this manual more useful, will be welcome. Nevertheless, no rights whatsoever may be derived from this manual, neither from any damage caused by errors in the text and/or in the automation process, nor through inexpert use of the systems and/or the connected equipment. On account of changes made in the software, the manual may differ from the software without any prior announcement.

1 INTRODUCTION

1.1 General information

OptiLink 7 Server + Web Access is available for all common browsers on your phone, tablet, laptop and/or desktop. You can make a connection via the Omnivent OptiLink server and navigate though the menu's like u are used to with the OptiLink 7 program.

With OptiLink 7 Server + Web Access you can create a dashboard page with your personal favourites. A dashboard can contain several Widgets. In each Widget you can select the information you want to show. This can be a complete page, your selection of lines or you can show your selection of graphics (max 4).

Please note that graphics settings must be made in the OptiLink 7 Server program before you can show them on the Web Access. When you have a Web Access contract you will also receive the login codes for OptiLink 7 Server. There you can make the setting for your graphics.

Web Access address : http://omnivent.optilinkserver.org/WebGUI

Here you have to enter your username and password.

(note: the address, username & password are capital sensitive)

There are several ways to make a connection to the ACT (ACC-25). Below a overview of the most common connections.

Connection setup:	Direct:	Server*:	Web*:
Used program/platform:	OptiLink 7	OptiLink 7	Browser
Description:			
OptiLink 7 Light (for one ACC-25 only)	☑	☒	☒
OptiLink 7 Total	☑	☒	☒
OptiLink 7 Server	☑☒	☑	☒
OptiLink 7 Server + Web Access	☑☒	☑	☑

Table 1: possible connection setup

Note: *For the OptiLink Server and for Web Access the ACT (ACC-25) must be connected to the internet.

Download OptiLink 7 program via our website www.omnivent.nl:
http://www.omnivent.nl/en-us/Services/Downloads-Omnivent
Extract the .zip file and start; OL7_Start.exe, installation code is 162110 and follow the installation wizard.

2 Connect

2.1 Connection with iOS device (iPhone/iPad)

Below you can see how to connect for the first time with a iOS phone/tablet. We advise to make a icon on your start screen for quick access.

<table>
<tr><td>Step 1:</td><td>Step 2:</td></tr>
<tr><td>Open your browser and type the URL
http://omnivent.optilinkserver.org/WebGUI

note: the address is capital sensitive</td><td>Your phone/tablet will suggest to make icon on your home screen
 </td></tr>

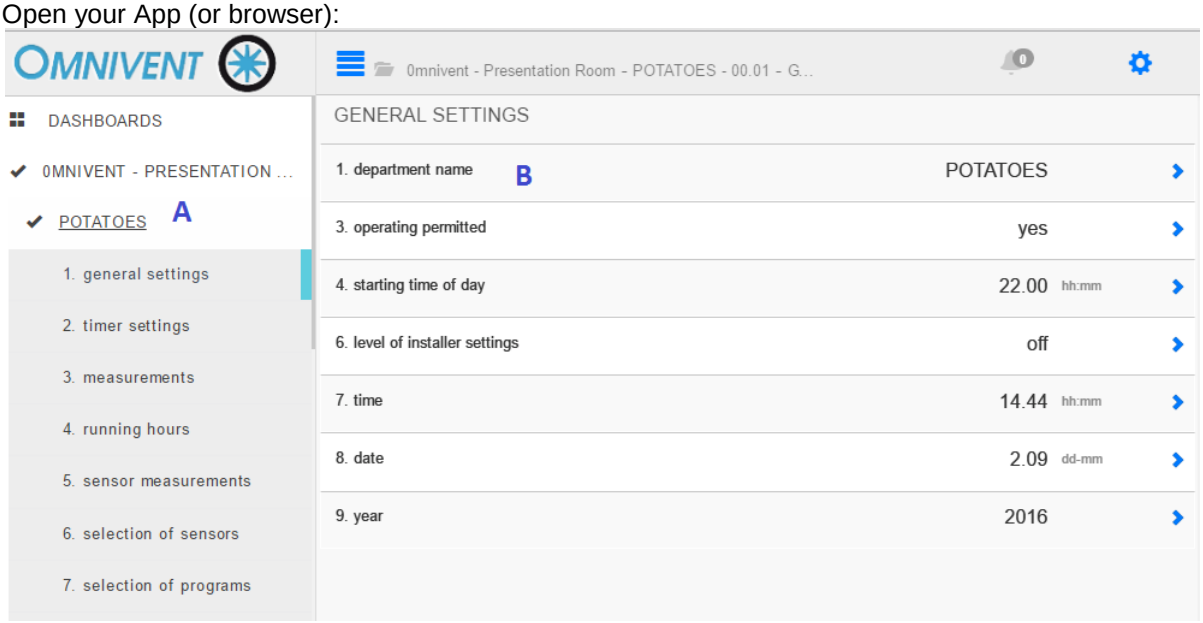
<tr><td>Now you are in the program, see chapter 3 for navigation in the program</td><td></td></tr>
</table>

3 Navigation in the program (functions)

Below screenshots are from a laptop with a Chrome browser. In general the functions of the program is the same for any operation system now.

Step 1:

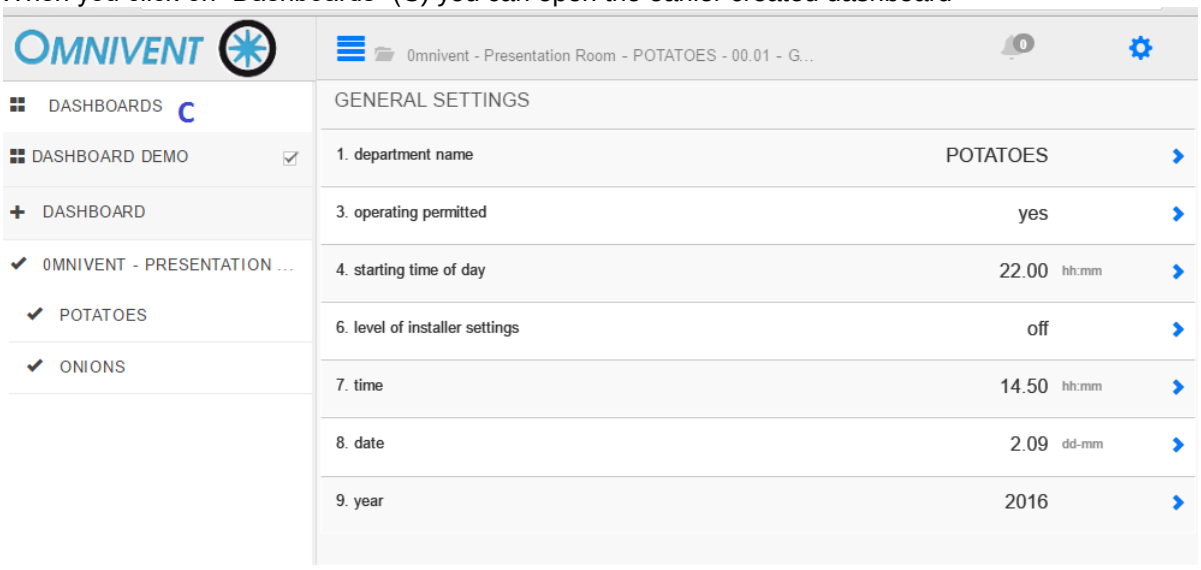
Open your App (or browser):



On the left menu (**A**) you can navigate on the right screen (**B**) like you are used to with the OptiLink 7 program. Navigation via department, page, line > setting.

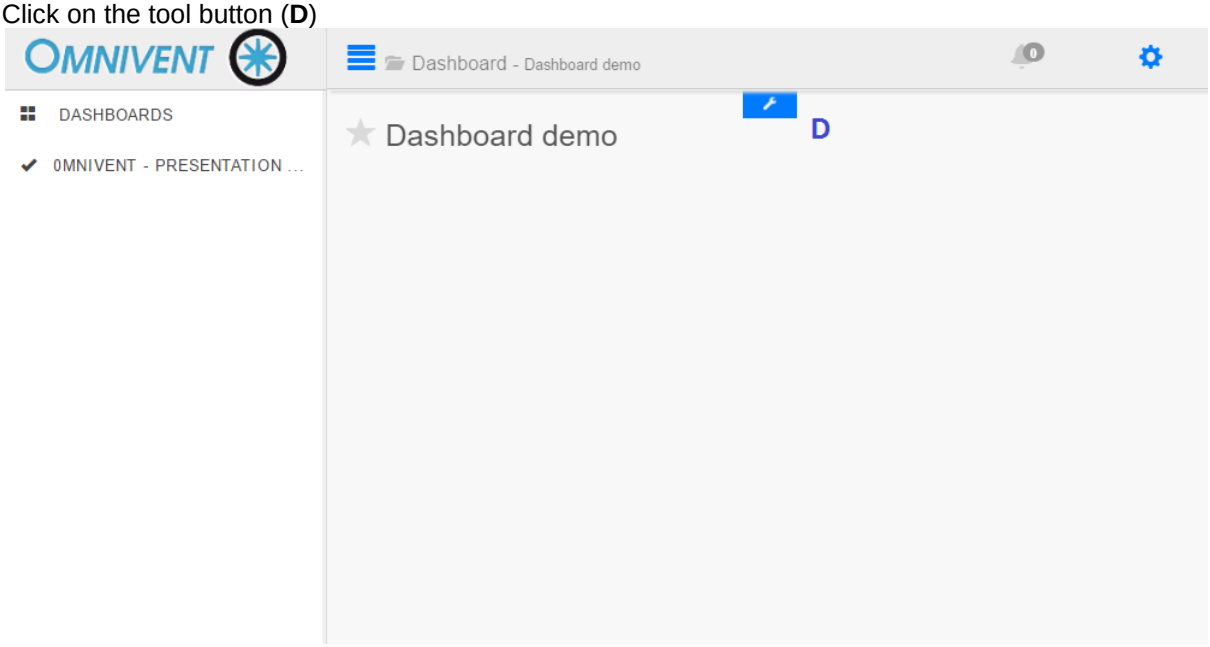
Step 2:

When you click on “Dashboards” (**C**) you can open the earlier created dashboard



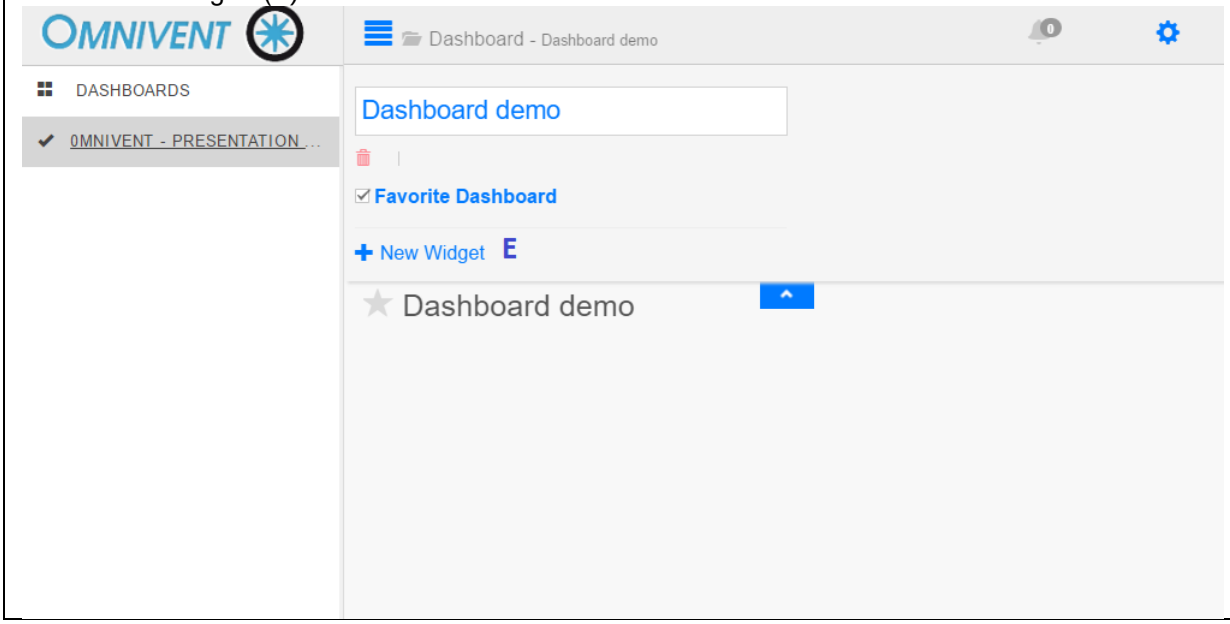
Step 3:

Click on the tool button (**D**)



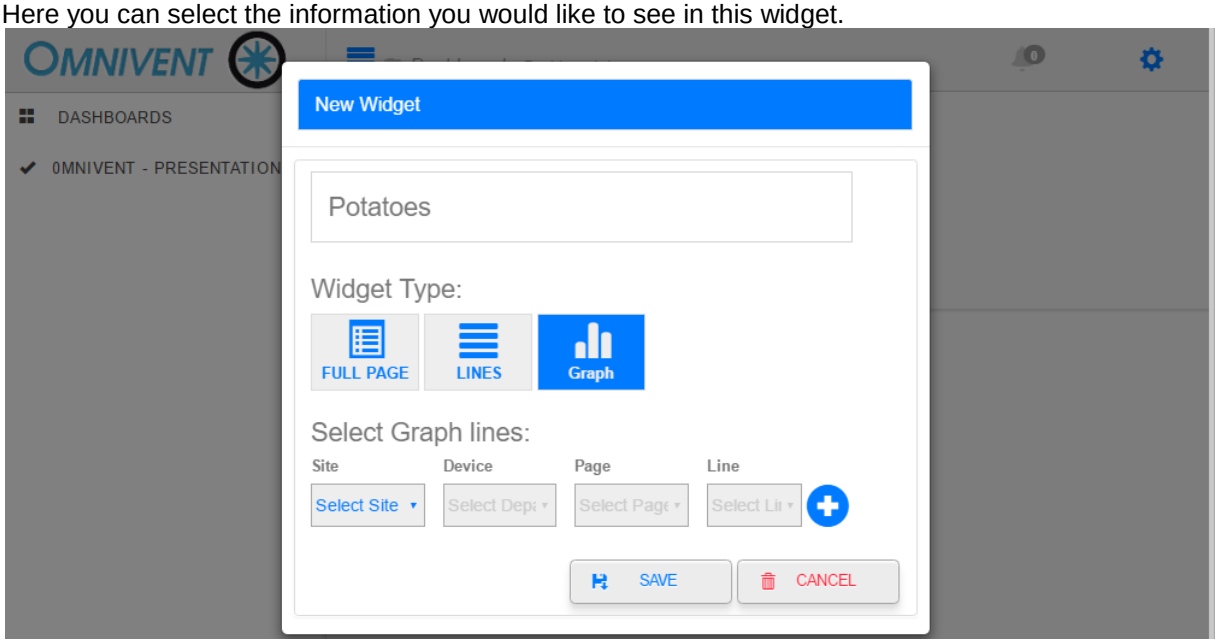
Step 4:

Press “New Widget” (**E**)



Step 5:

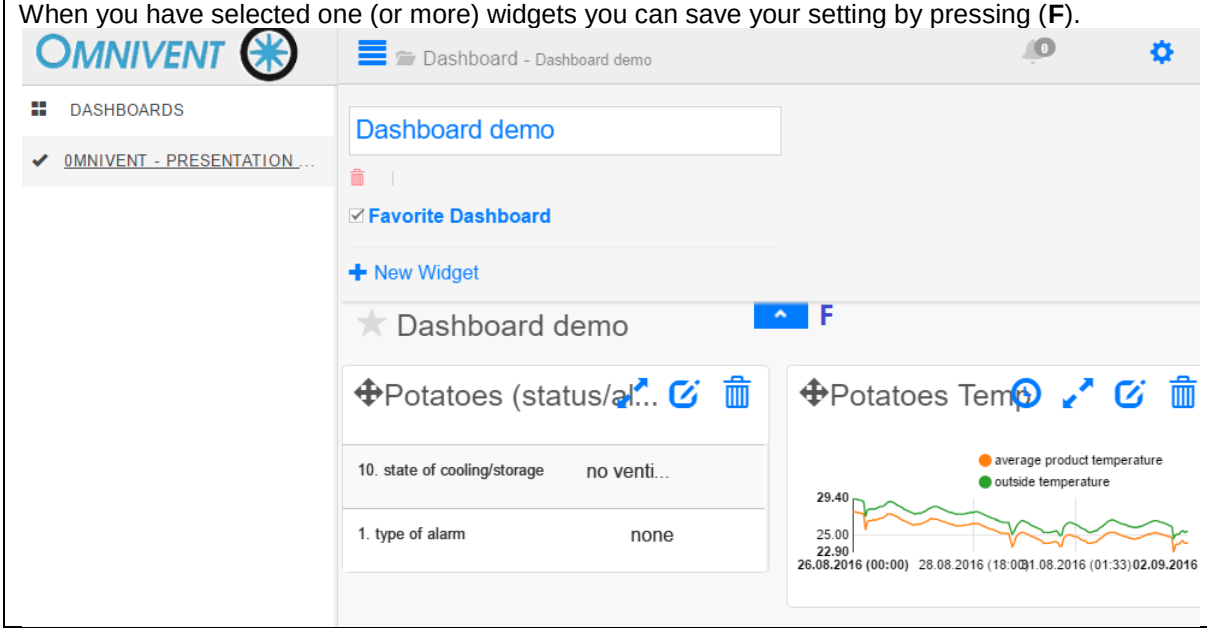
Here you can select the information you would like to see in this widget.



This can be a full page, your selection of lines or your selection of graphics. When you choose to select lines of graphics you can add extra lines by pressing the + button. Press “Save” to store settings

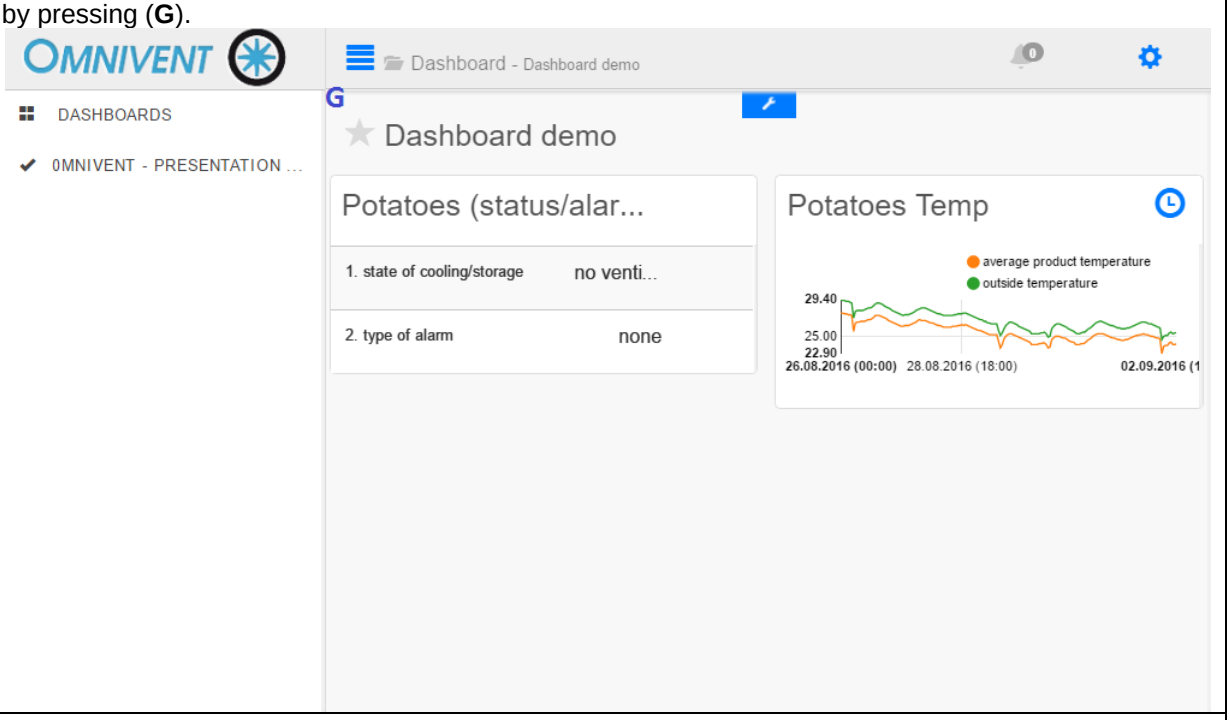
Step 6:

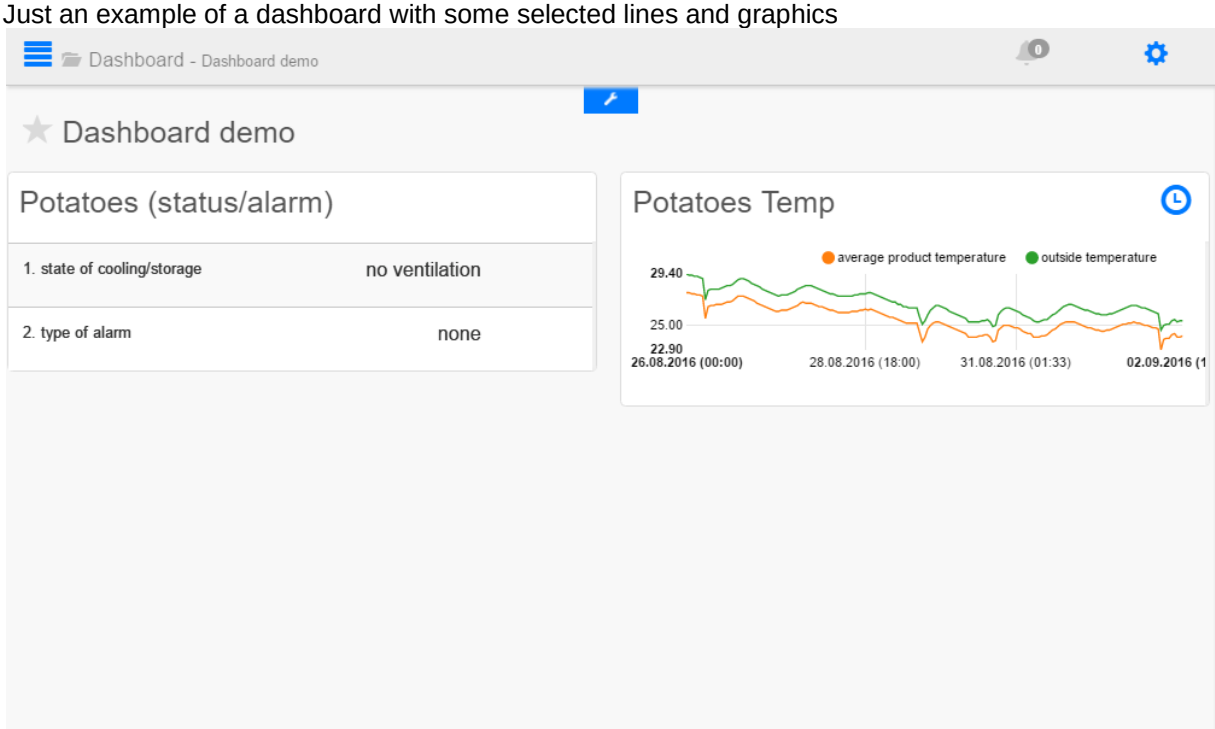
When you have selected one (or more) widgets you can save your setting by pressing (**F**).



Step 7:

Now you will see your selected page/line(s)/graphic(s) on your dashboard. You can hide the left menu by pressing (**G**).



Step 8:


Just an example of a dashboard with some selected lines and graphics
